This document is hereby regraded to
CONFIDENTIAL in accordance with the
letter of 15 October 1978 from the
Director of Central Intelligence to the
Archivist of the United States.
Next Review Date: 2008

1. a. The following aircraft were counted at the WIENER NEUSTADT
(O 48/X 35) airfield:

8 DC-3s, parked in a row along the northeastern border
of the field.

2 Pe-2s, with single cockpit, parked along the northeastern
border of the field.

120 single engine fighters parked in three rows along the south-
ern field border.

b. Description of fighters: Thick, clumsy fuselage; trailing
edges of rudder and elevator assemblies set in one line; tapering
wings; high, pointed rudder assembly; retractable landing gear;
two cannons in wings and probably four cannons in fuselage. A
fighter, in the afternoon, practiced firing at a sleeve target towed
by a Pe-2.

- c. The following motor vehicle [] at the
field:

tank truck
truck

[] Comment:

25X1

a. The same number of fighters was observed []
at the WIENER NEUSTADT airfield on 13 May 1949. []
have not yet confirmed these figures. It is assumed from this
report that at least two, possibly three, fighter regiments
are stationed at the field. The description does not apply to
any known fighter type. P-39s or P-63s have previously been
observed in WIENER NEUSTADT.
